(Gmail, Calendar, Docs, Contacts)

$300/month
(billed annually)

for 25 users

$150/month per block of 25 additional users
(billed annually)

> The Celigo Gmail integration has drastically improved how we interact with our customers and contacts when we receive requests and questions about orders. Being able to directly attach an email and have it available for future reference has made our Customer Care group more efficient even if a different Customer Care rep handles the communication.
>
> —— **JOHN CIROCCO**, DIRECTOR, IT KEGWORKS

> Celigo's CloudExtend for Gmail has greatly improved our company's workflow. It has become an essential part of our everyday interactions with our clients. Celigo has been incredibly responsive in improving this app over the past few months to meet our needs (The current version is even better than the first because it allows us to program both standard custom fields into the forms). It is also very useful to be able to pull up invoice history and client telephone contact information directly from Gmail instead of logging into NetSuite. Since the app is customizable we are exploring additional ways it could help us with our sales and customer service processes.

> Celigo CloudExtend G Suite is an amazing product. The ability to save emails directly into NetSuite, without having to copy/paste anything is a massive time saver. Total setup takes about 10 minutes adding new users takes about 15 seconds. If you have Google Business Apps and you use NetSuite, Celigo CloudExtend G Suite is a must have.
>
> —— **ZACH GUNNELS**, SYSTEMS ADMINISTRATOR, ONCENTER SOFTWARE

> It is amazingly simple and easy to save emails from Gmail into NetSuite. I highly recommend this tool for anyone who wishes to keep track of email conversations in NetSuite records.
