CloudExtend Excel for NetSuite
Powerful Data Manipulation

CloudExtend users can access and edit NetSuite data directly from within Excel (online or on the desktop) in real time and with a single click. Take full advantage of Excel's data manipulation functions to retrieve, update, add and delete NetSuite data from multiple record types. Need more from the traditional CSV Import/Export tool for NetSuite? Start your trial today and see why thousands of NetSuite user rely on Celigo to be more productive every day.

Cloud friendly

Runs on office.com or Excel Desktop as a Microsoft Add-In

Powerful data manipulation

Provides Excel functions for data manipulations, calculations, and analyses

Real time analysis and error resolution

Validates data and provides real-time error messages for immediate resolution, which CSV import cannot do

Convenient look-ups

Provides real-time lookups for fields during data entry so youn't have to remember values.

Productivity gains

Bring NetSuite data directly to Excel eliminating CSV exports and copy/paste

Broad use cases

Accountants, inventory planners, marketing analysts, system administrators, and all NetSuite users

Secure

Users inherit the permissions from their NetSuite role. Attempts to access records without appropriate permissions are blocked
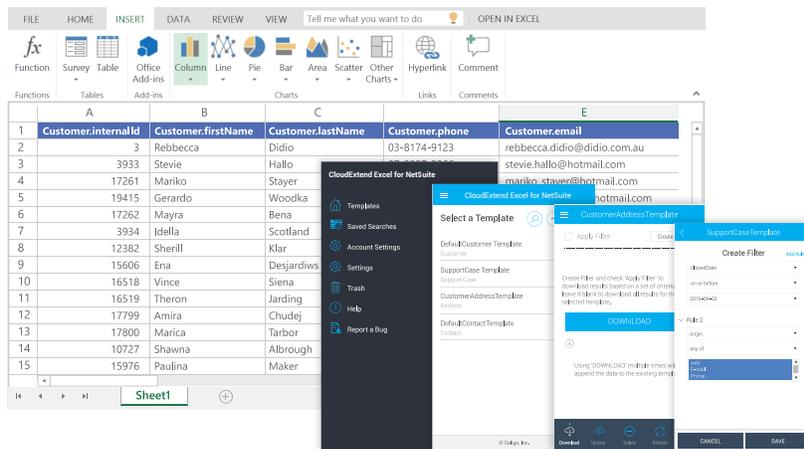

Search and Filter

Access saved searches in NetSuite or create your own data filter

Mass updates and bulk processing

Apply all of Excel's powerful native functionality to NetSuite data. Allows you to update multiple NetSuite records within seconds

View and update your NetSuite data from Excel

---

" Without Celigo's CloudExtend we would have to waste so much time doing tasks that with the CloudExtend it only takes us 30 seconds for. We use it for inventory Adjustments, Sales creations, employee creation and so much more. Love it!

JACOB MARSH, WEB MARKETING, PUZZLE ZOO

" The CloudExtend is a great product. I encourage everyone to have it available for at least some of their users.
